CSIS 151-1425

- 1) To access the CLI in the GNOME GUI, you open a terminal window.
- 2) GNOME is an example of a Linux GUI.
- 3) A live image is a bootable image of the operating system that will run from bootable media without requiring that the OS be installed on the local computer.
- 4) When you create a user in Linux, the OS creates a home directory on disk for that user.
- 5) When you write digital data to an optical disk, you are said to burn it.
